Location: Maturín, Venezuela | Remote

Summary:

As a Jr. Data Scientist and Telecommunications Engineer, I have 3 years of experience in network infrastructure and technical optimization. I integrate engineering logic with predictive analytics using Python, Pandas, Scikit-learn, and SQL. My focus is on transforming large volumes of data into strategic solutions that optimize processes and support business decisions with reliable evidence.

Languages: English: B1. Spanish: Native. Portuguese: Basic.

Experience:

Jr. Post Sales Engineer.

BVS Technology Solutions | ARGENTINA January 2021 – December 2021

- **Configured and deployed Cisco Meraki** network solutions for enterprise customers, improving corporate networks.
- **Analyzed Wi-Fi coverage**, utilizing the **Ekahau Sidekick** tool to **optimize signal quality**.
- **Provided initial support** in the implementation of network solutions with **Cisco Catalyst**, ensuring proper infrastructure deployment and operation.

NOC Support.

Ciena - Globenet | ARGENTINA February 2020 – January 2021

- **Performed 24/7 monitoring and tracking of the subsea backbone network in LatAm**, enabling timely adaptation and communication of any event.
- **First point of contact (Tier 1)** for the **resolution of critical network incidents**, working as a team to solve complex problems efficiently.
- **Ensured SLA compliance** by responding to incidents in less than **15 minutes** and providing **technical support** to international clients.

Skills:

- **Data Science:** Pandas, SQL, NumPy, Scikit-learn, TensorFlow, PyTorch, Supervised & Unsupervised Learning, Regression, Classification, Clustering, Time Series Analysis, A/B Testing, EDA, Matplotlib, Data Cleaning, Data Wrangling, ETL Pipelines, REST APIs.
- **Telecommunications:** TCP/IP, Routing & Switching, Network Traffic Analysis, Network Protocols (HTTP, DNS, SNMP), Signal Processing, Radio Communications.

Education and Certifications:

- **Telecommunications Engineering** | Universidad Católica Andrés Bello | 2019
- **Tripletten:** Data Science Bootcamp (2026).
- **Cisco Netacad:** Introduction to Networks (2020), Routing, Switching and Wireless Essentials (2020), Enterprise Networking, Security, and Automation (2020).

Projects:

Customer Churn Prediction for ISP:

Analysis of user behavior data. Data cleaning and identification of the target feature to predict, comparison and selection of predictive models, and model optimization. Accurately predicts 3 out of 4 customers at risk of churn.
